---

As a highly motivated and dedicated Full Stack Software Developer with 2 years of hands-on experience, I have a strong background in frontend & backend product development. With a solid understanding of SQL & noSQL databases and modern technologies such as MERN stack, Next.JS, TypeScript, I can develop efficient and scalable web applications working independently or as a part of a kanban or scrum team. Have passion in coding, I am constantly seeking new challenges and enjoy collaborating with cross-functional teams to achieve project goals.

## TECHNICAL SKILLS

**Languages/databases:** JavaScript, TypeScript, ES6, Python, HTML, CSS, jQuery, MongoDB, PostgreSQL.

**Libraries/Frameworks:** React.js, Redux, Next.js, Node.js, Express.js, Django, Mongoose, SCSS, SASS, Tailwind.

**Other Technologies:** Git, GitHub, Jira, Figma, Wordpress, JSON, MUI, unit tests, REST APIs, Babel, NPM, Tailwind.

## EXPERIENCE

**Full Stack developer** (*Empowered Futures, British Columbia, remote*)

**01/2023 — present**

- Maintain an existing platform, implement, test, debug features on backend and create mobile responsive web design. Evaluated and improved existing data under mentor supervision, deployed into CI/CD pipelines.
- Collaborate with a team of five developers in an agile environment to achieve desired results. Communicate with ui/ux designers to integrate responsive user interfaces, manage deliverables and make code review.

**Frontend engineer, developer** (*Freelance, remote*)

**03/2022 — 01/2023**

- Design, debugging, test software applications using Chrome Dev Tools, TDD, workflows, performance testing, storybook. Make code reviews and optimize to develop creative solutions, troubleshooting.
- Develop software, landing pages using CMS, collaborate with a team of five in the innovative startup environment using version control systems. Adapted websites for better usability, maintain existing code.
- Improve performance, reduce re-renders using React features for better scalability and web accessibility.

## PROJECTS

**Mentorship platform** (NextJS, Mongo, RESTful APIs, Cypress, Azure, docker)

<https://effront.azurewebsites.net>

- Fully mobile responsive web platform provides ability to connect people to achieve goals collaboratively. Using best practices in coding and latest technologies, the app has efficient user experience & data handling.

**Wastemart** (Mongo, Express, Reactjs, Node, JWT)

<https://github.com/RuslanDidun91/mern-ecommerce-project>

- Full stack, user centric web app, where I effectively integrated 3rd party API to display over 120.000 items dynamically. Using best practices such as responsive design, efficient database schema and secure auth.

**YardBarker** (Python, Django, Aws, Materialize, Heroku, PostgreSQL, Html, Css)

<https://yardbarker.herokuapp.com>

- User-centric web app provides full CRUD functionality, enabling job posting and applications as well as reviews and feedback features. Collaboration with a team of three developers in different aspects using VCS.

## EDUCATION

**Software engineering immersive** (*General Assembly*)

**09/2022 – 12/2022**

Full Stack development 500+ hours program focused on engineering practices, software architecture, MVC, development life cycle, object-oriented programming, js open-source libraries, agile development methodologies.

**Front-End software development** (*IT Incubator platforms*)

**03/2021 – 03/2022**

Fast-paced environment focused on software web applications development and architecture, React, Flux/Redux workflow, Typescript, asynchronous programming, process improvements and professional development activities.

## CERTIFICATIONS

**MongoDB Foundations** (*MongoDB*), **Google Cloud Foundations** (*Google Cloud platform*)

**01/2023**

More than 40 hours of course guides through CRUD operations, best practices in: data modeling, aggregation, performance improvements, cloud operations, security, web services, database documentation.

**Algorithms and Data Science** (*General Assembly*)

**11/2022**

Focused on algorithms, project management, innovation computer science, design patterns & data structures.

**Front-end web development** (*FreeCodeCamp, Udemy*)

**05/2021**

Course covers modern design and development visualization, JavaScript, animation, ux/ui, web technologies.
